

## Quantapoint Surpasses 600 Laser Scanning Projects

### *Reinforces Position as The Most Experienced and Trusted Provider of As-Built Laser Documentation*

**PITTSBURGH, Penn. (March 10, 2005)** — Quantapoint today announced that it has surpassed 600 successfully completed laser scanning projects. This major milestone reinforces Quantapoint’s position as the most experienced and trusted provider of as-built laser documentation™ to the processing, power and architectural industries.

Quantapoint’s significant experience includes major international projects (from the Americas to the Far East), industrial projects (such as refineries, offshore platforms, chemical facilities and nuclear power plants), and architectural projects (including the Museum of Modern Art, the Parthenon and the Smithsonian Institute). Quantapoint has also managed complex as-built documentation efforts, including multi-refinery clean fuels programs and entire offshore platforms – from sea level to helideck. Overall, Quantapoint’s experience includes hundreds of processing facilities and more than 130 educational institutions, 50 religious structures, 40 cultural sites and 30 office buildings.

“This milestone reflects our commitment to customer satisfaction, which has provided Quantapoint with a solid reputation and a leadership position in as-built laser documentation,” explained Eric Hoffman, CEO of Quantapoint. “Our success is based on our unique integrated ‘turnkey’ laser scanning solution. By combining laser scanning hardware, software, processing and delivery, we help ensure both high quality and responsiveness to customer needs. Recent industry consolidations have helped reconfirm the inherent strengths and competitive advantages of our integrated business model.”

Added Tom Greaves, Senior Analyst at Spar Point Research LLC, “In a market where service providers are considered experienced when they have a dozen or more projects behind them, Quantapoint’s execution of six hundred projects makes it the one of the most, if not the
