

## Quantapoint Press Release

### Quantapoint Completes 6,000 Laser Scans in One Month

#### *Another Industry Milestone for the Recognized Industry Leader in Helping Clients Achieve Zero-Defect Projects™ using Laser Scanning*

**PITTSBURGH, Penn. (March 12, 2007)** — Quantapoint today announced that it has completed 6,000 laser scans in a one month period, which is 300% more than any other company performing laser scanning. This major industry milestone reinforces Quantapoint’s position as the most experienced provider of laser scanning that can be used to help our clients in the processing, power, offshore and architectural industries achieve zero-defect projects.

According to Eric Hoffman, CEO, “Quantapoint has always led the way in innovation for existing conditions measurement technology, such as creating the [first 360° laser scanner](#), the [first software for displaying and extracting dimensional information from laser scan images](#), and the [first technology for integrating laser scan data into more complete and interactive laser models](#)™. We are proud to be the first company to complete 6,000 scans in one month, which is more than triple that of others that only provide basic laser scanning and do not provide the zero-defect project capabilities offered by Quantapoint. This once again reinforces our position as the industry leader.”

Chuck Andrews, Quantapoint’s Field Service Manager adds, “Quantapoint does not believe that ‘drive-by laser scanning’ in which data is collected and tossed to the client with little support and additional services provides companies with the best return on their investment. We focus on helping our clients extract the greatest value from their investment in Quantapoint using our zero-defect project capabilities. No other companies can offer the breadth of capabilities provided by Quantapoint, from digitizing facilities using laser scanning through designing with the digitized facility in 3D CAD and even construction visualization and planning.”

#### **About Quantapoint**

Quantapoint delivers technology and services that help our clients achieve Zero-Defect Projects™. We “digitize” facilities using our patented laser scanning technology and provide professional services for visualization, analysis, quality

control and decision support to help eliminate potential risks across the project lifecycle. Quantapoint is also a three time winner of the Pittsburgh 100 award for growth and has completed nearly 1,000 projects worldwide for the process, oil & gas, power and architectural industries. By following the steps in Quantapoint's Zero-Defect Projects capabilities lifecycle, clients have typically been able to beat their project budgets and schedules by 15% or more with a greater than 1,000% return on investment.
