

Quantapoint Press Release

Quantapoint Wins Communicator Award™ for Web Site and FlashPoint e-Newsletter

Recognized as Laser Scanning Industry Benchmark due to Outstanding Customer-Focused Communications

PITTSBURGH, PA (July 6, 2005) — Quantapoint, the most experienced and trusted provider of as-built documentation using integrated laser scanning™, is pleased to announce that its web site and FlashPoint e-Newsletter have been selected to receive awards of distinction from the Communicator Awards. The Communicator Awards is an international awards competition that recognizes outstanding work in the communication field. Entries are judged by industry professionals that identify companies whose communications serve as a benchmark for their industry.

According to Edward Dalheim, Judging Coordinator for The Communicator Awards, “This year the competition was very intense, with 5,078 entries from around the world. Less than 20% of the entries received an Award of Distinction. Quantapoint’s web site and FlashPoint e-Newsletter are a benchmark for customer-focused communications in their industry.”

“Quantapoint is a technology company whose sole focus is as-built laser documentation. Over our 750 projects, we have gained an in-depth understanding of both the significant value offered by this technology and the requirements for its successful application on projects,” says James McGill, Vice-president of Marketing at Quantapoint. “Our communication efforts are focused on providing this information to the market, via white papers on our web site (www.quantapoint.com), articles in the FlashPoint e-newsletter and various magazines and seminars. We are pleased to be recognized as an industry leader in customer-focused communications.”

About Quantapoint

With over 750 successful projects, Quantapoint, Inc. is the world's most experienced and trusted provider of as-built documentation using integrated laser scanning for the offshore, power, process and architectural markets. Quantapoint is an industry leader and innovator, holding several key technology patents. Quantapoint's as-built laser documentation provides more accurate and complete information for design, fabrication and construction decisions, including accurate dimensional fit-up, pre-fabrication and clash detection. The result is reduced costs, optimized schedules, increased quality and improved safety, with rework being reduced by more than 80%, among other benefits.
