

Quantapoint Press Release

Quantapoint Opens Houston Office to Expand Services to Gulf Coast and International Clients

Houston-Based Office will Increase Support and Services for both Regional and International Clients

PITTSBURGH, PA (June 19, 2006) — Quantapoint, Inc., the industry leader in as-built laser documentation™, today announced that it will open an office in Houston, Texas. The office will help Quantapoint better serve both Gulf Coast regional clients and international clients that are based in and around Houston. It will be a satellite to Quantapoint's global headquarters in Pittsburgh, Pennsylvania.

Eric Hoffman, Quantapoint's CEO, will relocate to Houston in early July to spearhead the expansion. Eric will lead Quantapoint senior consultants Bob Takacs and Ben Brown in expanding services with existing clients and identifying new clients to whom Quantapoint could be of benefit. Eric will continue to manage Quantapoint's vision and strategy from Houston.

According to Mr. Hoffman, *"The Gulf Coast region is experiencing growth not seen since the 1970's. Many process facilities are undergoing significant modifications and expansions, but poor existing condition documentation causes project cost and schedule overruns from design, fabrication and construction errors or omissions. Quantapoint will provide a local service that can rapidly 'digitize' a plant using laser scanning. This 'digitized plant' can be accessed on user desktops, via 3D CAD or as up-to-date 2D drawings. Quantapoint can also offer other capabilities that have helped our clients achieve zero-defect construction™, such as certification design information, verifying fabricated equipment and visualizing construction. By moving to Houston, I am demonstrating how strongly I believe in Quantapoint's services and the value we can provide to our clients. I look forward to directly working with current and new Gulf Coast clients."*

About Quantapoint

With more than 750 successful projects, Quantapoint, Inc. is the world's most experienced and trusted provider of as-built documentation using laser scanning for the offshore, power, process and architectural markets. Quantapoint is an industry leader and innovator, holding several key technology patents. Quantapoint as-built laser documentation provides more

accurate and complete information for design, fabrication and construction decisions, including accurate dimensional fit-up, pre-fabrication and clash detection. The result is reduced costs, optimized schedules, increased quality and improved safety, with project rework being reduced by more than 80%, among other benefits.
