

Quantapoint Press Release

Quantapoint Hires James McGill As Vice President of Marketing

Established Leader Brings Expertise in Software and Services to Increase Market Awareness

Pittsburgh, PA—September 24, 2004—Quantapoint, Inc., provider of the world's most accurate as-built documentation, today announced the hiring of James McGill as Vice President of Marketing. James will be responsible for the company's global marketing efforts, focusing on increasing market awareness as to the significant value offered by Quantapoint's solutions. He brings extensive experience in marketing software and service solutions to the processing industries. James joins Quantapoint from Aspen Technology, a provider of simulation software and services for the processing industries.

"James brings tremendous experience in marketing to Quantapoint and is an excellent addition to the management team," said Eric Hoffman, CEO of Quantapoint. "With his deep knowledge of both marketing and the processing industries, he is the right person to drive Quantapoint's marketing efforts. We are confident that his experience, leadership and marketing skills will lead our company to greater success."

"I look forward to using my expertise to help strengthen Quantapoint's marketing efforts and drive revenue growth," said James. "The company has a long history of innovation and a wealth of experience that provides a solid foundation on which to build a high-performance marketing organization."

Along with his extensive marketing background, James holds a Master of Chemical Engineering Degree from the University of Louisville and an Executive MBA from the joint program offered by the Universities of Calgary and Alberta.

About Quantapoint

With over 750 successful projects, Quantapoint, Inc. is the world's most experienced and trusted provider of as-built documentation using laser scanning for the offshore, power, process and architectural markets. Quantapoint is an industry leader and innovator, holding several key technology patents. Quantapoint as-built laser documentation provides more accurate and

complete information for design, fabrication and construction decisions, including accurate dimensional fit-up, pre-fabrication and clash detection. The result is reduced costs, optimized schedules, increased quality and improved safety, with project rework being reduced by more than 80%, among other benefits.
