

## Quantapoint Press Release

# Quantapoint Recognized with Fastest Growing Companies Award

***Latest Award for As-Built Documentation Leader and Innovator, Ranked  
13<sup>th</sup> Among Service Companies by the Pittsburgh Business Times***

PITTSBURGH, PA (August 31, 2005) — Quantapoint, the most experienced and trusted provider of as-built documentation using integrated laser scanning™, continued its award-winning ways by being recognized as one of the 100 fastest growing privately held companies in the region by the Pittsburgh Business Times. The award, which follows Quantapoint's recent Communicator Award for excellence in customer-focused communications, measures a company's revenue growth over the previous three years. Quantapoint ranked 13<sup>th</sup> in the service category and 34<sup>th</sup> overall with a sales growth of 67% and an employment growth of 38%.

“This year the competition was very intense,” said Richard Cerilli, Marketing Director for the Pittsburgh Business Times. “We reviewed thousands of entries and only 3% were selected to be in the Pittsburgh 100. Quantapoint is to be commended for ranking so well. They set a very high benchmark for their industry.”

According to Eric Hoffman, CEO of Quantapoint, “Our impressive growth is due to our dedicated staff of talented people. Quantapoint's laser scanning and data integration specialists have successfully completed nearly 700 projects, our CAD team has created more than 25,000 2D drawings such as piping & instrumentation diagrams (P&IDs), elevations and sections, and our hardware and software teams have continually created innovative technology that has led the industry. I am proud that Quantapoint has been selected as one of the 100 fastest growing companies in the Pittsburgh region.”

Added John Rothermel, Vice-president of Business Development at Quantapoint, “Quantapoint's growth is particularly impressive since we were introducing a new technology and educating the market as to its value. Quantapoint provides an integrated laser scanning service that combines hardware, software and 2D drawings and eliminates the hassle of buying hardware or software licenses. Our clients have found it to be the fastest, easiest and most cost-effective solution for creating detailed and accurate existing condition, or ‘as-built’, documentation for the offshore, process, power and architectural industries. Quantapoint has

enabled our clients to reduce costs, optimize schedules, increase quality and improve safety, reducing their project rework by more than 80%.”

### **About Quantapoint**

With nearly 700 successful projects, Quantapoint, Inc. is the world’s most experienced and trusted provider of as-built documentation using laser scanning for the offshore, power, process and architectural markets. Quantapoint is an industry leader and innovator, holding several key technology patents. Quantapoint as-built laser documentation provides more accurate and complete information for design, fabrication and construction decisions, including accurate dimensional fit-up, pre-fabrication and clash detection. The result is reduced costs, optimized schedules, increased quality and improved safety, with project rework being reduced by more than 80%, among other benefits.
