

Quantapoint Press Release

Quantapoint Recognized For Second Consecutive Year with Fastest Growing Companies Award

Quantapoint Significantly Improves Placement, Ranking 7th among Service Companies and 23rd Overall

PITTSBURGH, PA (September 18, 2006) —

Quantapoint is pleased to announce that it was recognized as one of the 100 fastest growing privately held companies in Pittsburgh and the surrounding region for the second consecutive year. Published by the Pittsburgh Business Times, the Pittsburgh 100 award measures a company's revenue growth over the previous three years. Quantapoint significantly improved its placement in 2006, ranking 7th in the service category (as compared to 13th in 2005) and 23rd overall (from 34th in 2005), with a sales growth of 109% and an employment growth of 60%.

“As always, the competition was very intense,” said Richard Cerilli, Marketing Director for the Pittsburgh Business Times. “We reviewed thousands of entries and only 2% were honored as Pittsburgh’s 100 fastest growing companies. Quantapoint is to be commended both for ranking so highly and their significant improvement in the rankings. They set a very high benchmark for their industry.”

According to Eric Hoffman, CEO of Quantapoint, “Though we are a technology company, we do not sell our patented laser scanning or other technologies. Instead we use them to provide services that help our customers achieve zero-defect construction™. This is our mission and we continually develop new innovations to help our client achieve it, such as our QuantaCAD™ software, which enables complete 3D laser models to be accessed in CAD for dimensional extraction, design and clash-checking or our SureFit™ service, which verifies that fabricated items match designs within a specified tolerance. It is this ‘customer-centric’ mission that has contributed to Quantapoint’s continuing strong growth. I am proud that Quantapoint has been selected as one of the 100 fastest growing companies in the Pittsburgh region.”

About Quantapoint

Quantapoint, Inc.'s mission is to provide services that help our clients achieve zero-defect construction™. We have used our patented laser scanning technology to “digitize” facilities and our supporting services to fully leverage and support its usage throughout the project lifecycle – from design through construction. Quantapoint continually develops new innovations to help our clients achieve zero-defect construction, such as our QuantaCAD™ software, which enables complete 3D laser models to be accessed in CAD for dimensional extraction, design and clash-checking or our SureFit™ service, which verifies that fabricated items match designs within a specified tolerance. With more than 750 successful projects, Quantapoint has helped our clients reduce their rework rates by 80% and overall project costs by 10% or more.
