

Quantapoint Press Release

Quantapoint Recognized For Third Consecutive Year with Fastest Growing Companies Award

Continuing Significant Growth Ranks Quantapoint 12th Among Service Companies

PITTSBURGH, PA (August 28, 2007) — Quantapoint is pleased to announce that it was again recognized as one of the 100 fastest growing privately held companies in Pittsburgh and the surrounding region for the third consecutive year. Published by the Pittsburgh Business Times, the Pittsburgh 100 award measures a company's revenue growth over the previous three years. This year, Quantapoint ranked 12th in the service category and 46th overall.

“The companies that make up the 2007 Pittsburgh 100 are the real strength of our regional economy and Quantapoint is to be commended for being in the top 100 for three years in a row,” said Alan Robertson, publisher for the Pittsburgh Business Times. “Quantapoint and the other members of the Pittsburgh 100 are the ones creating jobs and helping to build a new, vibrant business climate in the Pittsburgh area.”

According to John Rothermel, Vice-president of Business Development at Quantapoint, “Quantapoint's impressive growth is due to our ability to help companies eliminate preventable defects from projects in the architectural, offshore, power and process industries. By helping our clients achieve Zero-Defect Projects™, we have enabled them to beat their project schedules and budgets by 15% or more with a greater than 1,000% return on investment.”

Added Eric Hoffman, CEO of Quantapoint, “Our ability to grow so quickly is also due to our dedicated staff of talented people. This has enabled us to maintain our very high standards for quality and customer service, which has resulted in both significant repeat business and a high number of referrals. This speaks very highly of the talented people that are available in Pittsburgh and the surrounding region. I am proud of what we have been able to accomplish together.”

About Quantapoint

Quantapoint provides technology and services to help our clients achieve Zero-Defect Projects™. We “digitize” facilities using our patented laser scanning technology and provide professional services for visualization, analysis and decision support to eliminate potential risks across the project lifecycle. Quantapoint has completed more than 1,000 projects around the world in the process, power, offshore and architectural industries. Overall, our clients have typically been able to reduce their project costs and schedules by 15% or more.
