## Quantapoint Support Portal Released

***Designed to Enable Clients to Extract Maximum Value from Investment in Facilities Digitized using Laser Scanning***

PITTSBURGH, PA (November 13, 2006) — Quantapoint today announced that it has released the Quantapoint Support Portal. The Quantapoint Support Portal (QSP) is designed to enable Quantapoint clients to quickly access information and materials that can help them maximize their return on investment from facilities digitized using laser scanning.

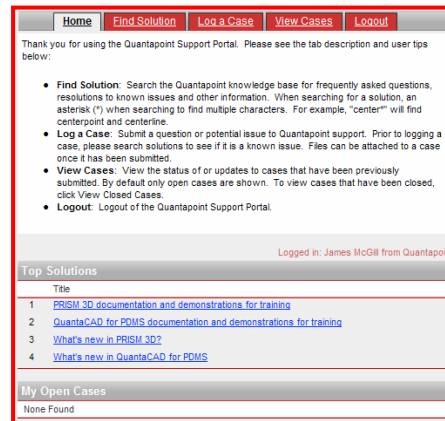

The QSP covers all Quantapoint products – including PRISM 3D for viewing the digitized facility on user desktops and QuantaCAD for integration of the digitized facility with 3D CAD – as well as answering frequently asked questions and defining terminology. The QSP enables clients to search through the Quantapoint knowledge base for solutions and best practices, view top solutions, submit a case to Quantapoint support, review the status and feedback on open cases and view the latest product documentation and automated training.

According to Keith Kelly, Industrial Services Manager at Quantapoint, *“Quantapoint does not believe that ‘drive-by laser scanning’ provides companies with a good return on their investment. We have always been focused on providing our clients with the information and support required to help them extract the greatest value from their investment in laser scanning. The Quantapoint Support Portal reflects our continuing commitment to industry-leading customer service and best practices development.”*

Existing Quantapoint customers may request access to the Quantapoint Support Portal by visiting <http://www.quantapoint.com/support.shtm>, e-mailing [customer.support@quantapoint.com](mailto:customer.support@quantapoint.com) or calling +1-412-653-0100 and pressing 3.

### **About Quantapoint**

Quantapoint’s mission is to provide consultative services and innovative technology to help companies achieve Zero-Defect Construction™. Quantapoint helps our clients minimize

construction defects such as interferences, unnecessary hot work or rework earlier in the project lifecycle before construction begins by providing capabilities to:

- 📍 Digitize facilities using laser scanning
- 📍 Access the digitized facility™ on the desktop
- 📍 Integrate 3D CAD with the digitized facility
- 📍 Certify design coordinate information
- 📍 Identify and resolve design clashes
- 📍 Certify that fabricated items match designs
- 📍 Construction visualization and planning
- 📍 Creation of as-built documentation

With more than 850 successful projects, Quantapoint has helped our clients reduce project costs and risks, with a typical return on investment of 1,000% or higher. For more information on our technology and services, please visit [www.quantapoint.com](http://www.quantapoint.com), e-mail [info@quantapoint.com](mailto:info@quantapoint.com) or call +1-412-653-0100.
