

Quantapoint

Client Testimonials for the Architectural Industry

“Without Quantapoint, our team would have proceeded through the design phase unaware that the project did not fit in the building. Through Quantapoint’s diligence and accuracy, we were able to catch a huge discrepancy in the square footage and make adjustments to the program.” – Project Manager

“What took Quantapoint under an hour to scan could have taken a crew hours or days to manually measure.” – Project Manager

“In the end, Quantapoint enabled us to save 75-80% of the time our design personnel would have had to spend on site by using as-built laser documentation instead of relying on traditional data collection methods.” – Project Manager

“By using Quantapoint, we were able to reduce uncertainty, reduce rework and enable the project owners to get the sign-off they needed to begin the construction process.” – Principal Architect

“Using Quantapoint minimized the need to place workers inside a hazardous, congested work area during construction.” – Project Manager

“Without Quantapoint we would have needed at least three times more staff to complete the assignment. That, of course, converted into substantial savings for the firm and our client.” – Senior Consultant

“Quantapoint saved us from having 4 team members on site for 5 business days, working 8 hours per day reducing our costs significantly.” – Project Administrator
