

Quantapoint Press Release

Quantapoint Promotes Millie Brinkley to Director of Industry Relations

Will Develop Industry Relationships to Increase Awareness of Quantapoint, Laser Scanning and Zero-Defect Projects™ and Speak at Traditional Building Conference

PITTSBURGH, Pa. and HOUSTON, Texas (Oct. 15, 2007) — Quantapoint (<http://www.quantapoint.com>) has promoted Millie Brinkley to Director of Industry Relations for the company, with a special focus on expanding relationships in the U.S. Gulf Coast Region. In this role, Millie will support Quantapoint in increasing awareness of the company's laser scanning technology and services and how they can be used to eliminate project defects and rework in the architectural, offshore, process and power industry sectors. Millie will divide her time between Quantapoint's Pittsburgh corporate headquarters and the company's new Gulf Coast regional office in Houston.

Millie will also be a featured presenter on "Achieving Zero Defect Projects Using Integrated Laser Scanning" at the Traditional Building conference in New Orleans on October 18th at 4:15 PM. She was chosen to speak at this event due to her extensive involvement with various AIA chapters, past speaking engagements and knowledge of the product and industry.

"Laser scanning is gaining acceptance within architectural and engineering circles as an effective tool for construction, revamp, renovation of historic preservation projects, yet we see tremendous opportunities for further penetration of laser scanning technology and solutions. Through meetings, seminars, speaking engagements and events, Millie is charged with increasing Quantapoint's visibility and explaining the value that the company offers potential clients and strategic partners," said James McGill, Vice President of Marketing and Business Operations for Quantapoint. "Millie's enthusiasm, professionalism experience, and dedication make her the right person to drive this effort for our company."

"Much of the industry is still unaware of benefits of laser scanning or is only scratching the surface of the potential benefits that can be achieved. By 'digitizing' facilities using laser scanning and providing visualization, analysis, quality control and decision support services, Quantapoint has helped clients reduce project rework from design, fabrication and construction issues by 98 percent or more," Millie added.

Millie joined Quantapoint in 2005 as Marketing Coordinator. In that role, she was responsible for event and trade show planning, maintaining and developing marketing collateral, production of the monthly newsletters and incoming lead qualification. Millie's key accomplishments for the company include increasing client awareness of Quantapoint and building relationships in new areas.

Millie is a member of several American Institute of Architects (AIA) chapters, the American Marketing Association (AMA), the Association for Preservation Technology (APT) and many charitable organizations. Her speaking engagements include the Houston AIA, Louisiana Restoration Expo and

multiple Traditional Building Conferences. Millie earned Bachelor of Science degrees in Business Administration and Industrial Psychology, as well as a Master of Science degree in Economics and Finance. An avid jogger and sports enthusiast, Millie also participates in several 5K runs and marathons for various charities.

About Quantapoint

Quantapoint provides technology and services to help our clients achieve Zero-Defect Projects™. We “digitize” facilities using our patented laser scanning technology and provide professional services for visualization, analysis and decision support to eliminate potential risks across the project lifecycle. Quantapoint has completed more than 1,000 projects around the world in the process, power, offshore and architectural industries. Overall, our clients have typically been able to reduce their project costs and schedules by 15% or more. For more information on our technology and services, please visit www.quantapoint.com, e-mail info@quantapoint.com or call +1-412-653-0100.
